Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Currently Amended) A hand-held bar tool, comprising:

a handle,

an electronic display for displaying a drink recipe, coupled to the handle; ~~and~~

a measuring device extending from the handle for measuring ingredients; and

a controller for determining text to be displayed on the display, wherein the controller displays a next ingredient in the recipe when a sensor senses rotation of the handle.

2.. (Original) The bar tool of claim 1, wherein the measuring device comprises a first and a second measuring container.

3. (Original) The bar tool of claim 2, wherein the first measuring container has a volume capacity larger than the second container.

4. (Original) The bar tool of claim 1, further comprising a memory for storing a plurality of drink titles.

5. (Original) The bar tool of claim 4, further comprising an actuator for scrolling through the plurality of drink titles stored in the memory.

6. (Original) The bar tool of claim 4, wherein each drink title has an associated list of ingredients stored in the memory.

7. (Original) The bar tool of claim 6, further comprising an actuator for scrolling through the list of ingredients stored in the memory.

8-9 (Canceled)

10. (Previously Presented) The bar tool of claim 1, wherein the display displays text.

11. (Original) The bar tool of claim 1, wherein the display displays icons.

12. (Original) The bar tool of claim 4, further comprising a communications port for changing the memory.

13. (Original) The bar tool of claim 1, wherein the measuring device is removable from the handle.

14. (Original) The bar tool of claim 1, wherein the measuring device is rotatable in the handle.

15. - 39. (Canceled)

40. (Previously Presented) A tool comprising:

a handle,

an electronic display for displaying a drink recipe, coupled to the handle;

a controller for determining text to be displayed on the display wherein the

controller displays a next ingredient in the recipe when a sensor senses rotation of the handle;

and

a measuring device extending from the handle for measuring ingredients.
